Weekly Coal Production

Production for Week Ended:
August 6, 1988

Preface

The *Weekly Coal Production (WCP)* provides weekly production estimates of U.S. coal by State, as well as supplementary data which are usually published twice a month. Supplement 1 includes monthly and annual U.S. level data on coal production, consumption, stocks, imports, and exports. Supplement 2 contains detailed monthly data covering coal production, electric utility coal consumption, stocks, and receipts (quantity and price); and coal imports and exports.

This publication is prepared by the Coal Division; Office of Coal, Nuclear, Electric and Alternate Fuels; Energy Information Administration (EIA) to fulfill its data collection and dissemination responsibilities as

specified in the Federal Energy Administration Act of 1974 (P.L. 93-275) as amended. *Weekly Coal Production* is intended for use by industry, press, State and local governments, and consumers. Other publications that may be of interest are the quarterly *Coal Distribution Report*, the *Quarterly Coal Report*, *Coal Production 1986*, and *Coal Data: A Reference*.

This publication was prepared by Wayne Watson under the direction of Noel C. Balthasar, Chief, Data Systems Branch. *Questions on energy statistics should be directed to the National Energy Information Center (NEIC) at (202/586-8800).*

Important Notice

As required by Federal Government regulation, the Energy Information Administration (EIA) is conducting a review of its publications mailing list. If you are on the EIA mailing list, you will receive a renewal notice, which must be filled out and returned to us. If we do not receive a response by August 31, 1988, your name will be removed from the EIA mailing list. If you have any questions, you may call the National Energy Information Center at 202/586-8800.

Note: This review does not apply to paid subscription lists maintained by the U.S. Government Printing Office.

Summary

U.S. coal production in the week ended August 6, 1988, as estimated by the Energy Information Administration, totaled 19.1 million short tons, a decline of 1.5 percent from production in the previous week. Production east of the Mississippi decreased by 0.4 million short tons (3.7 percent), whereas production west of the Mississippi increased by 0.2 million short tons (2.2 percent).

This week's coal output was 1.6 million short tons or 9.2 percent higher than in the corresponding week of 1987.

This publication includes coal production data by State for July 1988.
